GAN 金字塔搭载 GES+ 精控弹力系统，配备 4 组不同弹力大小的数调精控弹粒，每组弹粒设置 2 档轴距。

Gan Pyraminx uses GES+ technology, there are 4 different numerical GTNs with different elastic forces. Each GTN has 2 positions that work together with the pointer at the end of the core.

紫 Purple (1.8N)　　蓝 Blue (2.1N)　　绿 Green (2.5N)　　黄 Yellow (3.4N)

Ø：弹粒取出 / 装入位置。
0.6/0.8：2 档轴距，0.6 轴距紧，0.8 轴距松。

Ø：GTNs in and out position.
0.6/0.8：2 center piece travel indicators, 0.6 indicates tight handfeel while 0.8 indicates loose handfeel.
GES＋调试步骤 GES + Instructions

1

金字塔角块处设置易开凹槽，从凹槽处打开角块。

Open the corner tip from the edge with easy-opening cap.

调轴距：按压弹粒到底并旋转至目标刻度释放。
换弹粒：旋转弹粒至 Ø 位取出/装入。

Change centre piece travel：Press the tension nut to the bottom and turn until reaching the desired position.
Change GTNs：Turn the tension nut to Ø position, remove it and put in the new one.
